# Transitioning

1. Select track on USB Stick using the rotary
2. Listen to the track on your headphone (cue buttons on the mixer)
3. Adjust BPM (tempo) to the «Master» track by moving BPM controller up/down
4. Do the tracks match (see BPMs, listen on the headphone, check the graphs on the display)?
5. Press «Cue» or «Play» to play the new track on top of the «Master» track
6. Adjust «Lows», «Mids», and «Highs» to smoothly blend both tracks
7. Use the «Fader» to transition into the new track
8. Adjust «Lows», «Mids», and «Highs» of the previous track and use «Fader» to fade out
